

FILTRATION AQUATIS

COMAP

Aquatis is a smart solution for improving the quality of drinking water. It guarantees a good quality and tasteless water overtime. Composed of three filtration cartridges, it filters water naturally while preserving all its original minerals. Compact, Aquatis installs quickly under the sink and requires no connection to wastewater.

Advantages

- Improves the quality of drinking water while maintaining its minerals (calcium, magnesium ...) and therefore its natural benefits.
- Controls and automatically informs of consumables wear
- Replacing a cartridge takes less than a minute
- Installs everywhere even under sink
- No loss of water to the drains contrary to reverse osmosis
- Avoids the production, transport and recycling of plastic bottles

Application field

Aquatis is the ideal solution to enjoy a healthy and tasteless water at the main tap of the house. It is installed under the sink, on the inlet of cold water (connections provided).

FILTRATION AQUATIS

Technical specifications

- 3 levels of filtration:
 - 1st: sediments, taste and the smell of chlorine thanks to natural activated carbon 10 µm.
 - 2nd: pesticides and herbicides thanks to natural activated carbon at 10 µm.
 - 3rd: bacteria and viruses with hollow fiber membrane at 0.1µm.
- Buzzer and light for consumables wear
- 2 x AA LR6 batteries
- Dimensions: 36 * 27.5 * 9 cm
- 3-way or 1-way tap, optional
- Electrical standard: CE conformity
- Max pressure: 4 bar
- Temperature: 2 ° C - 38 ° C

Références	
Aquatis with 3-way mixer with 3-way tap	Q112017001
Aquatis with 1-way mixer	Q112018001
Aquatis without mixer without tap	Q112019001

Installation

Compact and design, Aquatis is installed under a sink and connects directly to the cold water inlet. No commissioning is necessary, once connected, Aquatis improves the quality of water instantly.

Maintenance

Aquatis controls and automatically informs about consumable wear through three indicator lights and an audible alarm. Depending on the volume of water and the time of use, the cartridges are to be replaced on average once to twice a year for a family of 4.

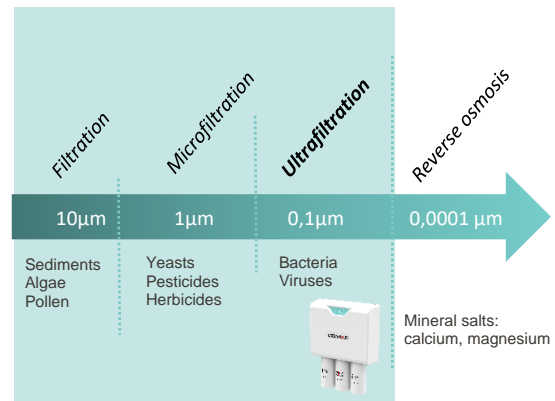

Références consommables	
Sediments & chlorine filtration cartridge – 1SC	Q112020001
Pesticides & herbicides filtration cartridge – 2HP	Q112021001
Bacteria ultrafiltration membrane – 3BU	Q112022001

Warranty

2 years parts and labor - excluding consumables and transport.

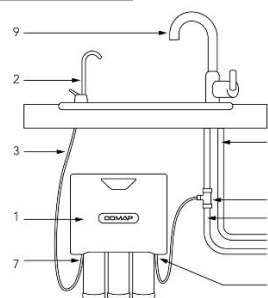

Ultrafiltration principle

With a filtration threshold of 0.1µm, Aquatis retains harmful substances such as sediments, pesticides and bacteria. Unlike reverse osmosis, essential minerals are preserved and no water discharge is generated.

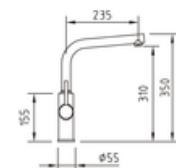

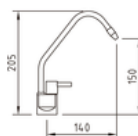

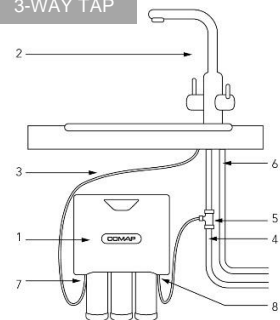

Under-the-sink installation

1-WAY TAP

3-WAY TAP

1. Aquatis
2. 1 or 3-way tap depending on option
3. Plastic pipe to connect the tap
4. Cold water inlet
5. Fitting and shut-off valve
6. Hot water inlet
7. Outlet (filtered water, left or right side)
8. Inlet (non-filtered, left or right side)
9. Main water tap kept
